

JOINT PRESS RELEASE : 2<sup>nd</sup> January 2012

**Raby Engine Development & Subarugears join forces in the North American market**

Jake Raby, Founder and President of Raby Engine Development in Cleveland, Georgia U.S.A. and Todd Triebler, Founder and Managing Director of Subarugears Pty Ltd in Sydney, Australia announced today that they have signed an exclusive reseller agreement for Subarugears reversed transmissions and components in the North American Market.

This agreement appoints Raby Engine Development as the first and only reseller of Subarugears unique components in the 51 states of U.S.A., Canada and Mexico.

Todd Triebler commented – “Adding an organisation as well-regarded and experienced as Jake Raby’s to our Sales program further enhances both companies’ development resources. Jake will be taking our core transmission product and developing bolt-in packages for all types of vehicles and power-plants, with the same quality, reliability and attention to detail as the Air-Cooled packages he is famous for.”

Jake Raby further added – ‘We’re excited to be the first and only reseller of Subarugears product in North America, having watched the Subarugears evolution over the past 12 months and the growing popularity of their packages. Raby Engine Development has created some unique Subaru based packages for release in 2012, which we know the market will be excited about. We now have the ability to develop and offer complete Subaru driveline packages for Porsche and VW applications; coupling unparalleled performance and reliability into a well-rounded, bolt in arrangement.”
